Responsible for development of a new corporate identity and design system. Produced moodboards, styled product photoshoots, held partner meetings and developed concepts with the Creative Director.

Designer

Freelance

August 2013 – ongoing

Printed matter, digital design, web design.

About

In 2013 I graduated in Design at HDK-Valand. Since then I've practiced and explored the connection between the digital and the visual in a user experience through personal projects, freelance work and continuing education in Web Development at Yrgo.

Now I'm a digital multi tool with a wide skillset in programming, design, and UX.
